SUMMARY

BCA student (2023–2026) with hands-on experience in Python, data analysis, and machine learning fundamentals. Skilled in data cleaning, exploratory data analysis, feature selection, and building classification models for real-world problems such as fraud detection. Seeking an AI / Data Science internship to apply analytical skills and machine learning concepts.

TECHNICAL SKILLS

Languages: Python, SQL

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Tools: Excel, Power BI, MySQL, VS Code, Git/GitHub

Machine Learning: Supervised Learning, Classification Models, Logistic Regression, Model Evaluation

Other: Data Cleaning, Data Visualization, Exploratory Data Analysis, KPI Analysis, Data Reporting, Analytical Thinking

PROJECTS

Fraud Detection using Machine Learning

Tech: Python, Pandas, NumPy, Scikit-learn

- Built a supervised machine learning model to detect fraudulent financial transactions.
- Performed data cleaning, outlier analysis, and feature selection based on domain knowledge.
- Evaluated model performance using confusion matrix, precision, recall, and F1-score on imbalanced data.
- Interpreted model results and proposed actionable fraud prevention strategies

EDUCATION

Intermediate Science (PCB), CBSE (2022-2023)

Bachelor of Computer Applications (BCA), Maharshi Dayanand University, Rohtak (2023-2026)

CERTIFICATIONS

Data Analytics – Deloitte

OCI AI Foundation – Oracle

Generative AI – Google, Oracle

Communication Skills – TCS

STRENGTHS

Problem Solving • Fast Learner • Logical Thinking • Discipline
